Kalasa Puja, Ganapathi Puja, main devatha Puja etc should be performed as per their specific rituals.

Note: When reciting the Sankalpam, the Tithi at the time of Sun rise should be mentioned. In case at the time of performing the Puja, the Tithi is different from the sun rise time, then add “Prayuktha” to the Tithi at Sun Rise and then mention the Tithi at the time of the Puja. For example, if the Tithi at Sun Rise is Dasami and at the time of Puja is Ekadasi, then the Sankalpam should be mentioned as “Dasami Prayukthayam Ekadasyam”. In certain special occasions, in case the Tithi does not come at the time of performing the Puja, then adding “Samyuktha” to the Tithi is appropriate. For example, Vinayaka Chavithi Puja is performed on Chavithi Tithi, but it does not start until late morning or afternoon, in which case the Sankalpam should be mentioned as “Chaturdhi Samyukthayam Trithiyayam”. The day of the week, star, yoga and karanam at the time of sun rise should be always mentioned in the Sankalpam. Samvatsara, Ayana, Ruthu, Paksha, Tithi, Vaara should be checked with that year's Panchangam or Calendar.

WHY WE SHOULD SAY SANKALPAM IN PUJA RITUALS

For any work that we are going to perform, first we have to think about it, completely plan it and after that we should execute to get fruitful results.

The process of thinking before starting the work is Sankalpam.

"CLEAR THINKING GIVES POSITIVE RESULTS"

We have to minimize Cosmic energy to specified place and time.

While identifying himself, the person performing the Puja will need to specify his gothra, name, place, and kaalam. This process is called as Sankalpam.

Before performing any spiritual or religious activities, it is better to know the locations specific Sankalpam.

For this reason, to meet the needs of the devotees in United States we are happy to present our small support in providing this sankalpam.

Sri Viswaivasu Naama Samvatsara North America English Panchangam

ABOUT OUR PANCHANGAM

The determination of auspicious time is based on different factors such as Tithi (Ending Movement of the lunar day); Vaara (day of the week), Nakshatra (the star closer to the moon); Yoga (angular relationship between Sun and Moon) and Karanam (Half of a Tithi). The combination of all the 5 factors, also known as the five limbs, is called as a Panchangam. Historically, A typical Panchangam may state tabulations of positions of Sun, Moon, and other planets for every day of the year on a fixed place (longitude, latitude) and time of day (in 24-hour format IST). The users calculate the remaining data using their relative difference from this fixed place and time.

Over time, the Panchangam has been modified to be based on hours and minutes, so that it can be easily understood by everyone, and this new method is being called as Gantala Panchangam. With this new method, Yoga and Karanam have been excluded from the process of determining the auspicious time. All the five factors have been considered in the process of preparing this Panchangam, as all the five are equally important for this.

The Indian community has spread across different continents, settled in different countries and are consistently following the traditions of our culture. Panchangam is a very important component of our tradition to determine the auspicious moments or determining the festivals that signifies our culture strongly. It is important to prepare the Panchangam that takes into consideration the different time zones across different countries. This Panchangam has been prepared with an intent to provide this facility to all the Indians settled in the United States.

All the five factors specified above have been considered in preparation of this Panchangam, along with providing daily auspicious, bad times, Rahu and Yama impact times, sunrise, sunset times, and festival times. Additionally, the yearly predictions for all the twelve Raasi (Zodiac Signs), auspicious times for performing different events, different important information also has been provided. All the Indian festivals as per the U.S. Time has been provided.

In the Panchangam, the three important parts of astrology are provided – influence of planets, muhurtha and the results. The influence of planets is determined based on planetary position, the start movement and location. The Panchangam provides multiple muhuraths based on the local planetary positions and Nakshatra, along with the time zone differences. This Panchangam provides predictions applicable to majority of the people, but based on their specific planetary positions, they are advised to discuss with their horoscope specialists.

The Panchangam has been prepared to help the Indians settled in America, but there are no other intentions for this. Astrology is a very vast subject, and we have a decent understanding and interest in this area. Our efforts to prepare this Panchangam are offered to the sacred feet of Lord Sri Venkateswara Swamy. Experts in this area are requested to bless us and suggest us for any improvements. Based on the feedback and suggestions received for last year's panchangam, we made efforts to incorporate all the changes in this year. We are very thankful for the suggestions and feedback provided. We all should continue to improve the Panchangam year after year, because this is our Panchangam.

With Warm Regards

Why Some of the Festivals comes early in America Than India?

Tithi, Vaara and Nakshatra are determine based on the movement of earth and moon. Depending on the rotation of the earth, the sunrise timings will be different at various places which represents the beginning of the day. Normally during Sankalpa, the tithi, vaara and nakshatra are recited depending on the sunrise time. In Americas, we follow the same procedure as well.

Within the festivals, for Ugadi, Sri Rama Navami, Vijaya Dasami, Naraka Chaturdasi are celebrated if the corresponding Tithi is at the time of Sunrise. Some festivals are celebrated if the tithi is in the afternoon, for example, Ganesh Chaturthi (Vinayaka Chavithi) should be celebrated when Chavithi is along with the Triteeya instead of Chavithi along with Panchami. Also, looking at Vinayaka Chavithi festival rationally, it is said in the Vrata story that people who see the moon on Vinayaka Chavithi will face insults during the year and this can be avoided if they perform the Vinayaka Puja, listen to the story and put akshataas on their head. So, if the Puja is performed when Chavithi comes along with Panchami, then everyone can see the moon during Chavithi hours. Similarly, this is applicable for Sankatahara Chaturthi as well.

For Pradosham, if the Trayodasi is in the evening, then it is considered auspicious for Siva Aaradhana. Sri Satyanarayana Swamy Vratam can be performed any day, but is very auspicious when performed on Ekadasi, Pournami tithi's and as mentioned in the story, the Puja must be performed in the evening hours.

Some festivals must be celebrated when the tithi is in the evening, for example, Krishna Ashtami is celebrated when Ashtami Tithi is in the evening time when Lord Krishna was born. Similarly, Diwali is also celebrated in the evening.

Maasa Sivaratri and Maha Sivaratri are celebrated when Chaturdasi Tithi is available during midnight, when the Linga Udbhava happened. The starting and ending time of tithi are considered to determine the festivals.

Once the day of the festival is determined, it is celebrated the full day. Overall, depending on the local time and the importance of the festival, we should celebrate the festival. The easier way is to follow this is to use the local panchaangam.

For any festival, performing the Pujas relevant for the festival or god, performing the specific vratas as per the tradition is important. These Pujas must be performed depending on the location, time and personnel situations, either at home or at religious places, individually or as a group.

NIRGHYAM

In case of unavoidable travel during an inauspicious time, it is recommended to keep a necessary item at a friend's place.

This would need to be done during an auspicious time and will be picked up at the time of travel.

By doing this, any bad or negative impacts of traveling will be eliminated. This process is called as Nighnyam.

WHY PHOTOS AND VIDEOS PROHIBITED IN THE TEMPLE

World is the mix of energy and object. Every object from atom to universe is activated by energy. The total energy of different objects form a gigantic energy form which we call Lord.

Energy is activated by sound

By reciting Mantras in the Temple, Energy is evident in light form All living things have an aura. This will be more for spiritualists and incarnated people.

For deities it will be very high and with the usage of photo and video the aura will be reduced.

We see people who stay before cameras lose their charm. As per studies, it is also proved that these people lose their memory .

Homa, Japa, Archana, Abhishekam with devotion to the deity increases the aura. WE don't want to reduce that by clicking photos and taking videos.

So we better to stop it

THE INNER MEANING OF VISITING TEMPLES

Every person will learn from mother on how to express his / her emotions such as love, affection, kindness, and happiness, reactions, language and physical expressions. From the child's father, he or she will learn how to build relations, responsibilities, lead a disciplined and successful life.

The combination of qualities mentioned above can be seen between family members, relatives, friends and neighbors. Employment, education, social values, quality of life etc., are learned from teachers and educational institutions. All the learning is only possible in the first quarter of a person's life. There is still three-fourth of life that is remaining. People should lead life with individual decisions. The world that needs his direction and support is already built in.

Who is going to teach the person? How will he learn? All the difficulties that arise during this lifetime, troubles, doubts, problems etc. would need to be solved. As a mother, father or teacher, there will be no one that can provide the knowledge or support and the only way to obtain this support is to take the spiritual or religious path.

Society is made up of people. The spiritual world can provide the answers to many unanswered questions, answers that arise from the person's inner conscience. The central point of the spiritual world is Temples. Taking the darshan of the main deity that is incarnated in the temple can help the person to develop his focus, attention, peace etc. and performing Archana or Abhisekham or Homams will help in developing sacred feelings; distributing prasadam to others visiting the temple, participating and providing volunteer service to the various events in the temple will help in developing the nature of being satisfied, humbleness and patience. Being part of various religious activities will help in building the quality of give and take, social responsibility and togetherness. By giving time, monetary support, volunteer service to the various activities will help in developing the art of giving, sacrifice and build immortality.

The efforts being put to build a better society will help in reaching the god. Looking at the other devotees that come to the temple will always inspire and help in leading a qualitative life. This inspiration will help us constantly wherever we are, whatever we are doing and will make us to be the best persons in the society. The people who visit the temple whenever possible will make them respectful in the society, identify them as people who lead a qualitative life.

All these are the benefits that a person receives through the religious institutions, but there are benefits that the society also would receive through these institutions. Constructing a temple itself is a moral responsibility of the society. This is one of the ways to provide the support to the society during drought times and helps many people to participate in the construction.

A temple will help many people by giving them a way to earn money and feed their family members. This would include the management of the temple, the priests who perform the Pujas in the temple, the priests who prepare prasadam being offered to the God, musical artists who perform at the temple, sculptors, people who

Narrate the stories of God, dancers, actors, gardeners etc. All these people are deeply involved in the service to the God and lead a very happy and enjoyable life. As the time passed by, the Procedures may have changed but the rituals are being performed.

In olden times, when there was no means to produce food; guests and travelers were always hosted by the villagers. Every village had a temple, even though there were very few hotels. Even when travelers reached a village after all the hotels are closed, the temple always had prasadam that helped them to satisfy their hunger. To invite these people, there were bells ringing in the temple and prasadam was being offered. The temple premises used to be temporary resting places for the travelers and the villagers. People used to spend their leisure time by serving at the temple.

In olden days, people can reach out to the temple as an organization that can help them to perform some good deeds by donating and supporting the needy people. These organizations can help many people financially, physically, and socially. The money from the rulers or the kings was being donated to the temples, so that the money can be used to support the needy and the poor people. The temples were always providing the support in difficult times and were the financial support to the kingdom.

It is recommended to understand the importance of the gods and goddesses incarnated at the temple, significance of the deities, vehicles, main tower (gopuram), temple peak point (shikaram), pillars, main sanctum, water fountains etc. It is also important to know the procedures to be followed in the temple, duties and responsibilities of everyone in the temple, being pure and pious, dress codes etc., and will allow the people to develop the responsibility towards the society.

When we visit the temple, it is a practice to offer fruits, flowers etc., to the God. Along with offering the physical items such as fruits, flowers. And also the Hindu traditions have given us a list of 8 items that one should offer to God for leading a pious life:

ASTROLOGICAL THEORY – VERSIONS – CO-ORDINATION

Indian astrology is calculated by the vision of Universe from the Earth. There would be difference between this, and the calculation taken from the center of the Earth. It could be the same or it could be different. If we leave this discussion to the astrologers and scientists and analyze the Indian Astrology, there are 3 main Theories that should be understood:

1. Sentence / Ancient Astrology: The theory that is based on the sentences and factors provided in the ancient astrological books. As this procedure was followed some thousands of years ago and due to lack of a system that can update the various changes in the universe, this procedure may not be completely applicable to the current world.

2. Surya Siddhantam: This theory keeps the Sun in the center and determines the positions of various planets. Even though this theory is very close to the current astronomical phenomena of the universe, there are still some differences that arise at times.

3. Drik Siddhantam: This theory utilizes the computations performed using basic constants derived from observations of astronomical phenomena. As this theory takes into consideration the changes due to the passing time and as it is very close to the current astronomical theories, Drik Siddhantam has been taken as a basis to prepare this Panchaangam.

Though there are nine types of calendars available to prepare a Panchaangam, only five are currently being used widely:

1. Solar Calendar: If we see the movement of grahas, raasi with stars and stars with 4 paadams etc are calculated by vision mensuration. This is based on Solar calendar. This calendar exactly explains the positions of grahas. It depends on the movement of the Sun. Month starts with Surya Sankramanam. Year starts with Mesha Sankramanam. Every year has 365 days. This Solar calendar is followed by the people who stay in the southern part of the river Kaveri. Excluding the festivals and start date of the year, Westerns also follow the same calendar.

2. Lunar Calendar: Lunar Calendar is calculated by the movement of the Moon. In this, every month starts with Waxing crescent and ends with New Moon. Depending on these tithis, we celebrate festivals, organize functions, and follow fastings etc. Every year has 354 days. This Lunar calendar is followed by the people who stay in the northern part of river Kaveri and southern part of Vindhya mountains.

3. Barhaspatyamanam: Calendar which is calculated by Bruhaspathi graha (Jupiter) is called Barhaspatyamanam. This Bruhaspathi takes one year to move from one raasi to another raasi. This calendar is used to know the changes in rainfall, crops, expenses etc. Every year has 361 days. Earlier, people in North India used to follow this calendar.

4. Savanamaanam: Savanamaanam is one type of calendar in which the year starts

with the month Sravana. Every year has 360 days with 30 days in a month. This Calendar is used to calculate period of pregnancy, auspicious days after childbirth, predictions of rainfall etc. People in Northwest of India seems to follow this calendar.

5. Nakshatramaanam: The Nakshatramaanam is the calendar where days are calculated by starting and ending time of the Star. This calendar is very important to analyze the horoscopes and life period of humans. This also helps to celebrate few festivals and traditional procedures. Every year has 324 days.

Depending on these calendars, starting of the year may change but there is no change in the festivals. Depending on the local monsoons, crops, and rainfall, New year day may vary in different places. But all regions consider the sum of all five parts Tithi, Vaara (day), Nakshatra (star), yoga and Karana.

Even though there are five types of calendars, there is a proper balance of these in India. Months are considered by the name of the Star, Year is considered by the movement of Guru, Kaarthi depends on Sun etc. indicate the balance of the calendars. Whole country celebrates Sri Rama Navami, Krishna Ashtami, Sankranti and Vijaya Dasami at the same time even though there are differences in the types of calendars. Sometimes depending on the traditions there would be change in the importance of Tithi and star. It is advisable to follow the traditions, regional customs, and family and Teacher instructions.

Increase and decrease of the days in a month finally aligns all the five types of calendars for a complete year. Ancient Rishis are ideal for us who used all types of calendars to calculate the needs of humans and shows the importance on the usage of Panchaangam.

The question of whether astrology is a science, or a myth has been raised multiple times. The People who look at Astrology to know their future, they would always treat this as a belief, but knowing the future is only a part of Astrology. Looking at the theories and the systems explained above, it can be said that Astrology is also a science.

At the time in the history where there were no mechanism or equipment available to predict the rainfall or changing seasons, when to cultivate which crops etc., astrology was a way to indicate the farmers about the different seasons. In the olden times, astrology was used to determine the best time to perform the Coronation ceremony to the emperor or when to attack the enemy countries or how to protect the country from being attacked. It was also used to identify the different festivals based on the seasons and determine the names of these festivals accordingly, which unified all the people of the country during the celebrations.

During these festivals, people were donating to the needy and helped them to understand which acts are required to be performed at suitable times. In this way, as astrology helped people to identify the time and helped them to lead a good life, it has been compared with the eyes of Vedic sages and saints. Instead of arguing whether astrology is a science or a myth, let us accept this as a gift from the saints and continue using it in the correct way.

THE INNER MEANING OF VISITING TEMPLES

Every person will learn from mother on how to express his / her emotions such as love, affection, kindness, and happiness, reactions, language and physical expressions. From the child's father, he or she will learn how to build relations, responsibilities, lead a disciplined and successful life.

The combination of qualities mentioned above can be seen between family members, relatives, friends and neighbors. Employment, education, social values, quality of life etc., are learned from teachers and educational institutions. All the learning is only possible in the first quarter of a person's life. There is still three-fourth of life that is remaining. People should lead life with individual decisions. The world that needs his direction and support is already built in.

Who is going to teach the person? How will he learn? All the difficulties that arise during this lifetime, troubles, doubts, problems etc. would need to be solved. As a mother, father or teacher, there will be no one that can provide the knowledge or support and the only way to obtain this support is to take the spiritual or religious path.

Society is made up of people. The spiritual world can provide the answers to many unanswered questions, answers that arise from the person's inner conscience. The central point of the spiritual world is Temples. Taking the darshan of the main deity that is incarnated in the temple can help the person to develop his focus, attention, peace etc. and performing Archana or Abhisekham or Homams will help in developing sacred feelings; distributing prasadam to others visiting the temple, participating and providing volunteer service to the various events in the temple will help in developing the nature of being satisfied, humbleness and patience. Being part of various religious activities will help in building the quality of give and take, social responsibility and togetherness. By giving time, monetary support, volunteer service to the various activities will help in developing the art of giving, sacrifice and build immortality.

The efforts being put to build a better society will help in reaching the god. Looking at the other devotees that come to the temple will always inspire and help in leading a qualitative life. This inspiration will help us constantly wherever we are, whatever we are doing and will make us to be the best persons in the society. The people who visit the temple whenever possible will make them respectful in the society, identify them as people who lead a qualitative life.

All these are the benefits that a person receives through the religious institutions, but there are benefits that the society also would receive through these institutions. Constructing a temple itself is a moral responsibility of the society. This is one of the ways to provide the support to the society during drought times and helps many people to participate in the construction.

A temple will help many people by giving them a way to earn money and feed their family members. This would include the management of the temple, the priests who perform the Pujas in the temple, the priests who prepare prasadam being offered to the God, musical artists who perform at the temple, sculptors, people who

Narrate the stories of God, dancers, actors, gardeners etc. All these people are deeply involved in the service to the God and lead a very happy and enjoyable life. As the time passed by, the Procedures may have changed but the rituals are being performed.

In olden times, when there was no means to produce food; guests and travelers were always hosted by the villagers. Every village had a temple, even though there were very few hotels. Even when travelers reached a village after all the hotels are closed, the temple always had prasadam that helped them to satisfy their hunger. To invite these people, there were bells ringing in the temple and prasadam was being offered. The temple premises used to be temporary resting places for the travelers and the villagers. People used to spend their leisure time by serving at the temple.

In olden days, people can reach out to the temple as an organization that can help them to perform some good deeds by donating and supporting the needy people. These organizations can help many people financially, physically, and socially. The money from the rulers or the kings was being donated to the temples, so that the money can be used to support the needy and the poor people. The temples were always providing the support in difficult times and were the financial support to the kingdom.

It is recommended to understand the importance of the gods and goddesses incarnated at the temple, significance of the deities, vehicles, main tower (gopuram), temple peak point (shikaram), pillars, main sanctum, water fountains etc. It is also important to know the procedures to be followed in the temple, duties and responsibilities of everyone in the temple, being pure and pious, dress codes etc., and will allow the people to develop the responsibility towards the society.

INTRODUCTION BEFORE DECIDING GOOD MUHURTAMS

Panchangam is the mix of tithi, Vaara, Nakshatra, yoga and karana. Main usage of Panchangam is to determine time and its significance. If we define clearly :-

Tithis (15):- padyami, vidiya, tadiya, Chavithi, Panchami, Shashthi, Saptami, asthami, Navami, dasami, ekadasi, dwadasi, trayodasi, chaturdasi, pournami, Amavasya. In these tithis normally vidiya, tadiya, Panchami, Saptami, dasami, ekadasi, trayodasi are good. People who follow lunar calendar they consider pournami and who follow Solar Calendar they consider Amavasya as good days. On specific times like Shashti is good for education, Krishna padyami is good for special occasions.

Vaara (7 Weekdays):- The good days are Wednesday, Thursday and Friday for any occasion. In the Sukhla Paksha, even Monday is auspicious. In certain situations, for example, bravery display or fights, Tuesday is considered to be good; for certain business related activities or performing shanthi Puja's Saturday is considered to be good and for certain political activities, Sunday is considered to be good.

Stars (27):- Aswini, Bharani, Krittika, Rohini, Mrigashira, Arudra, Punarvasu, Pushyami, Asresha, Makha, Purva Phalguni, Uttara Phalguni, Hasta, Chitra, Swati, Visakha, Anuradha, Jyeshtha, Moola, Purva Ashada, Uttaraashada, Sravana, Dhanishtha, Satabhisham, Poorvabhadra, Uttarabhadra, Revathi. Wihtin these, normally Aswini, Rohini, Mrigashira, Punarvasu, Pushyami, Uttara Phalguni, Hasta, Chitra, Swati, Anuradha, Uttaraashada, Srvanam, Dhanishtha, Satabhisham, Uttara Bhadra, Revathi are considered to be good. Apart from these, depending on the situation certain stars are good and some of them are considered to be bad.

Yogamu (27):- Vishkambham, Preethi, Ayushmaan, Soubhagyam, Sobhana, Atiganda, Sukarma, Dhruthi, Shula, Ganda, Vriddhi, Dhruva, Vyaghata, Harshana, Vajra, Siddhi, Vyathipaath, Vareeyaan, Parigha, Siva, Siddha, Sadhya, Subha, Sukla, Brahma, Indra, Vaidhriti. Wihtin these Vyaghatha, Ganda, Vyateepat, Shula, Vaidhriti, Athiganda, Vishkambham, Vajra, Parigha are not considered to be good. Others are considered to be good.

Karanamulu (11):- Bava, Balava, Kaulava, Taitila, Garaji, Vanaji, Bhadravaan, Shakuni, Chatushpaat, Naagam and Kimstugnam. Within these, the 5 Karanams upto Garaji are good. From Vanaji till the last Karanamu are not considered to be good.

Within these 5 items, if atleast 3 are good then that day is considered to be good. It is a good practice to analyze the Tithi, Vaara and Nakshatra; for determining the auspicious muhurath utilize the Panchakarahitham along with the Lagna, but calculating purely on the 3 aspects may lead to lower importance for yoga and Karanam. When among the Tithi, Vaara and Nakshatra, if one or two of them is weak, we can determine the day to be auspicious if the yoga, Karanam are good. For any muhurath, the strength of lagna is important. At the time of the muhurta, it is important to ensure that there is no Varjya or Durmuhurtham; must be an auspicious moment; must be good Panchakarahitham to become the strength of the lagna. The good planets in better positions; the bad positioning of the other planets is essential to have grahabalam. At times when the lagna, graha bala are on the weaker side, it may still be an auspicious time. Those minor guna doshams have been indicated in brackets near the muhuraths. In some situations, it is better to ignore the lagna tyajya and pakshachidra tyajya and consider only the location and time depending on the circumstances.

IMPORTANT POINTS TO REMEMBER FOR DETERMINING THE MUHURTAM

LAGNA MATTERS:- Having more positives and lesser negatives is an auspicious muhurath. When Budha is in the Kendra Sthanam from Lagna(1,4,7,10 places), he will clear 500 doshas (bad deeds); Sukhra is in the center of Lagna, he will clear 5000 doshas and when Guru is in the center of Lagna, he will clear 100,000 doshas. Budha, Guru and Sukhra when located at a specific location will eliminate all doshas. Even if Chandra is in a bad position, he will still provide good results when he is watching a Subha graha. Rahu and Ketu who shadow the planet are not considered to cause trouble.

From Sunrise to the fourth muhurtha is abhijeet lagna; seventh muhurtha is godhoolika lagna will help in eliminating all doshas and are good for marriages and travelling. For Westerners and Kalingas, godhoolika muhurtha is considered to be good; for all other countries the abhijeet muhurtha is considered to be good and will eliminate all doshas. As Ashtama Kuja; Shashta Sukhra and Shashtaashtama Dwadasa Chandra eliminate doshas, similar to guru who is in the center and Ravi who is in a better position will also eliminate doshas.

PANCHAKARAHITA MATTERS:- It is better to ignore Raja Panchaka in employment; Chora Panchaka during journey; Raja and Agni Panchaka during house warming; Roga Panchaka during Thread Ceremony and Marriage aspects and Mrutyu Panchaka in all aspects. Roga Panchaka on Sundays; Mrutyu Panchaka on Saturdays; Agni Panchaka on Tuesdays; Raja Panchaka on Thursday and Monday; Chora Panchaka on Wednesday and Friday must be ignored. Chora and Roga Panchaka during night times; Raja and Agni Panchaka during day time and Mrutyu Panchaka during midnight must be ignored.

SUNYA MASAM MATTERS:- It is Soonya Maasam, when Ravi is in Meena Raasi during the month of Chaitra; Dhanur Raasi during the month of Pushya; Mithuna Raasi during the month of Aashada and Kanya Raasi during the month of Bhadrpadam. This period is not auspicious for Marriage or other important events.

TITHI (Pakshachidra) MATTERS:- It is auspicious for starting work after 3:24 mins from the beginning of Chavithi; 3:48 mins from the beginning of Shashthi; 5:36 mins from the beginning of Ashtami; 4:00 hours from the beginning of Dwadasi and 10:00 hours from the beginning of Chaturdasi.

LAGNA TYAJYA MATTERS:- It is recommended to ignore 12 mins from the beginning of lagna for Mesha, Vrushaba, Dhanassu, Kanya Raasi; 12 mins before the end of lagna for Meena, Makara, Karkataka, Vruschika Raasi; 12 mins in between the lagna for Mithuna, Kumbha, Tula, Simha Raasi.

Important Note: In this Panchaangam, while showing Puskaramsa for muhurthams, the Varjya / Durmuhurtha Lagna sparsha has been adjusted by slightly ignoring 12 mins before and after the actual time to show the muhurtha pushkara time. The positions of the shadowing planets Rahu and Ketu, Lagna of Chandra, sashtaashtama Dwadasa graha stithi are ignored by the power of Guru and Sukra. Rest of the graha lagna which are not mentioned in this can be calculated by the above predictions.

Importance of the Utsavam (Festivals / Celebrations)

“Utsuthe Harshaha Anena Ithi Utsavaha” This will make the people ecstatic and hence it is called as Utsavam or a Festival. Ecstatic is something that is happiness beyond expressions. The celebrations that will make everyone very happy is called as Utsavam or a Festival. This is the reason we treat all the celebrations at home as festivals. For example, marriage festival, naming ceremony etc.

When a celebration makes a person or a family very happy and we call it as a festival, then what should we call the celebrations that make the entire community happy? These are the festivals that are celebrated at the temples.

There are various celebrations performed at different times to make the devotees happy. The celebrations performed at the temple daily are. Called as Nityotsavam, performed on weekly basis are called as Vaarotsavams. Similarly, there are celebrations performed at the temple which are called as Pakshotsavams, Maasotsavam, and Varshikotsavams etc. Any celebration being performed will help in improving physical, mental happiness of the devotees.

The Puja's that mandate fasting, taking limited prasadam, taking bath at prescribed times will help in improving physical health, reaching God, closeness / friendship with other pious devotees, mental happiness, understanding the religious philosophies, reciting stories, Stotras, mantras, japa, concentration, helping other devotees and attain moksha.

So, is it required to perform celebrations to these many Gods and Goddesses? YES, it is required. All these Gods and Goddesses are the incarnations of the Supreme God. Whoever we believe, we pray to that God. The procedures to pray and perform Puja to the God / Goddess are mentioned as part of the mantras, shastras, aagamas and based on these the celebrations have been defined.

A kid who is learning to take small steps by holding his father's hand will think that he is giving the support to his father to walk. The kid's mother will feed him food, but the kid thinks that he is feeding his mother. Similarly, the festivals / celebrations we perform to the God are the same. The God treats us as a small kid and will bless us with all our wishes.

The time decided to perform the festival to the God, that day, week, month and the year are very special to that God. This will make the God very happy. The time will help us to complete the festival successfully and peacefully. The celebration of the festivals to the God are to make the humankind happy but not to indicate that we are doing something to the God. Let us all be happy, ecstatic and attain Nirvana (Moksha) with the grace of the God.

ANNUAL SPECIAL RITUALS IN OUR TEMPLE

SRI VISHNU SAHASRA NAMA YAGNAM May 4, 2025

Performing Homam is the best offering to the GOD. The line “Agnimukhavai Devaaha” in Vedas confirms that the Gods take the offerings given by human beings in the Homam and will bless them with prosperity. “Yagno Wai Vishnuhu”. As per Vedas Yagna is Vishnu, so what can be more beneficial than praying Vishnu through Yagna? In our temple, we recite VishnuSahasra Nama Parayanam some hundreds of times and to reap the benefits of this, we perform the Sri Vishnu Sahasranama Yagnam on the third Sunday of May every year.

SRI GAYATRI YAGNAM (Second Sunday in July) July 23, 2025

“Na Gayatryaha Param Mantram”. There is no other mantra more sacred than Gayathri Mantram. It is natural for the people who have been initiated with Gayathri Mantram to constantly recite the mantra. Those who have not been initiated will pray with the Gayathri Slokam. For the perfection of all the people who have recited Gayathri Mantram or Slokam throughout the year, and for granting the wit to those people who could not recite the same, we perform this Yagnam on the third Sunday of July every year.

PAVITROTSAVAM Siva Parivar - Sravana Bahula Panchami to Saptami Jul 29-31, 2025. Vishnu Parivar - Sravana Bahula Navami to Ekadasi August 2-4, 2025.

Pavitrotsavam, means purifying. The GOD purifies the whole universe on daily basis through his various incarnations. But, there may be people who may come to the temple unknowingly when they are not supposed to and make the premises impure. To purify the temple premises and also to purify the deity who may have been unpurified due to wrong chanting of the mantras is called as Pavitrotsavam. In our temple, during Pavitrotsavam we perform special Homams and Abhisekhams to all the deities, and also offering Pavitra Malas (made with five colors of silk threads) to the deities.

SRI SIVA SAHASRA KALASA ABHISHEKAM (Sunday before Sravana Masam Varalakshmi vratam) August 10, 2025

Rainfall is needed to prevent global warming, environment protection and good crops. Sahasra Kalasa Abhisekham is performed for obtaining good rainfall and resources required for the well-being. Lord Siva, who has descended Ganga to the earth with the request of Bhagiratha, is Abhisekha Priya (he who loves Abhisekhams). The number thousand is a representation to infinity. Performing Abhisekham to Lord Siva with on thousand Kalasas (copper vessels) and praying him to provide growth to everyone in the universe is Sahasra Kalashaabhisekham. This event is performed in our temple during the auspicious Shraavana month, which is during the monsoon period and the Sunday before Varalakshmi Vratam, the puja performed to the Goddess who grants all the wealth to human beings.

BRAHMOTSAVAM

(Jyeshtha Suddha Panchami to Trayodasi)
05-31-2025 to 06-08-2025

The Vaikunta abode Lord Mahavishnu came down to earth to in the form of Lord Sri Venkateswara and resided in Sethutheertha (Bridgewater).

The festivals celebrated during those days are called as Brahmotsavams. The first festival performed by Lord Brahma for Lord Mahavishnu are known as Brahmotsavams and became the standard for various festivals celebrated in all the temples.

The festival is celebrated as per Pancharatra Agama Sastra in our temple starting from Jyeshtha Suddha Panchami to Trayodasi by observing a nine-day deeksha.

The main events during this festival are Sahasra Deepotsavam, Sahasra Kalasa Abhisekham, Srinivasa Kalyanam, Brahma Sabha, Rathotsavam etc.

SRI VENKATESWARA JAYANTI (Aswayuja (Kanya) Maasa Sravanam) October 02, 2025

“Kalau Venkatanayakaha”. Lord Sri Venkateswara is considered to be the God in Kaliyuga. Maha Vishnu, who is abode in the Vaikunta, took the form of Sri Venkateswara and resided in Tirumala and to grace his blessings to all the devotees throughout the world, he became part of the various Gods in different temples and became the main deity at our Sethutheertha (Bridgewater) temple in New Jersey. In our temple, the Sri Venkateswara Jayanthi is celebrated on Aswayuja (Kanya) Maasa Sravanam. On this occasion, Lord Venkateswara is worshipped by performing Astotharasatha Kalasa (108 Kalasas) Abhisekham, Garuda Vahana Seva and many special pujas.

SRI CHANDI HOMAM (Sunday after Devi Navaratri) October 05, 2025

During Sarannavaratri, Goddess Sri Rajarajeswari will be worshipped with Satvika, Rajasika, Tamasika Tatvas in different forms. The glory of Goddess is described using Beejamantras in Sri Chandi Sapta Sathi Parayanam. In our temple, the recitation of Chandi Parayanam on every Friday is concluded by performing the Chandi Homam on the Sunday after the conclusion of Devi Navaratri.

SRI SAHASRA LINGARCHANA (Sunday after Karthika Pournami) November 9, 2025

Sahasra Lingarchana is a unique Vedic ritual worshipping Lord Siva. It is performed by doing Puja to thousand Parthiva Lingas made with well prepared and sanctified mud. Lord Vishnu is Alankara Priya and Lord Siva is AbhisekhaPriya. It is a very blissful experience witnessing Lord Siva's Rudraabhisekham while chanting one of the most powerful Vedic Mantras. Witnessing Abhisekham to one Siva Linga is amazing, but Abhisekham to over one thousand Lingas is beyond words. Performing Archana and Abhisekham to ‘Loha Murthy’ (deity made with metal) and ‘Shila Murthy’ (deity made with stone) results in showering of divine blessings, but performing Archana and Abhisekham to ‘Parthiva Murthy’ (deity made with mud) results in the fulfillment of righteous desires faster. To bring culmination to the daily Siva Abhisekhams as well as the special ones performed on auspicious and festival days, this Sahasra Lingaarchana is performed on the immediate Sunday after Karthika Pournami.

TEMPLE ANNIVERSARY DAY (Magha Bahula Ekadasi) February 12, 2026

To meet the spiritual and cultural needs of various Indians who have migrated to America, some responsible people have gotten together, faced many challenges and on a very auspicious date and time have started our Sri Venkateswara Temple at Bridgewater. The temple that started long time back with the difficulties faced by a few people has now grown to meet the spiritual needs of many of us. We celebrate the Temple Anniversary Day every year to pray to the GOD to give us the same determination with which the temple was started. On this auspicious day, we perform Homams, Abhisekhams to all the GODS and also perform a special Abhisekham to Lord Sri Venkateswara Swamy.
